

Kevin Tavares Mistrele

Front-End Engineer

👤 Profile

I am a Front-End Software Engineer with over 4 years of experience building scalable, high-performance web applications. Specialized in React, Angular, and TypeScript, I have a proven track record of delivering complex architectural solutions and driving business growth through technology. With recent expertise in the healthcare sector, I focus on building resilient, user-centered interfaces while maintaining high standards of Clean Code, accessibility, and performance in Agile environments. I actively leverage AI-powered tools and agents (Claude Code, OpenAI Codex) to accelerate development workflows — including a custom multi-agent orchestration system built to investigate problems, implement quality code, perform automated code reviews, and open pull requests following project-specific rules and standards.

🏢 Employment History

Front-End Engineer at Portal Telemedicina, Remote

Jan 2024 — present

- Responsible for developing and maintaining large-scale healthcare user interfaces using Angular and React, ensuring a stable and high-performance frontend architecture for thousands of daily medical exams.
- Engineered a configuration-based multi-tenant architecture, reducing client onboarding time by 97% (from 1 month to 1 day), significantly accelerating time-to-market and revenue generation.
- Designed and implemented a serverless WebRTC file transfer solution via QR Code, eliminating 100% of insecure third-party app usage and automating exam uploads directly to doctor dashboards.
- Integrated React micro-frontends within a legacy Angular codebase, developing features like a "Gamified Waiting Room" that improved patient retention and reduced drop-off rates by approximately 20% .
- Developed an administrative resilience dashboard for real-time video monitoring, enabling manual interventions that recovered over 80% of potentially failed teleconsultations.
- Refactored and standardized the company's proprietary Design System using TailwindCSS and TypeScript, reducing UI-related bugs by 30% and ensuring consistent UX across all products.
- Collaborating in an Agile/Scrum environment, participating in code reviews, CI/CD pipelines, and utilizing Git for structured release management — while applying Claude Code and OpenAI Codex within a custom multi-agent orchestration pipeline to investigate issues, implement code following clean code standards, perform automated reviews, and open pull requests automatically.
- Applied WCAG accessibility standards across healthcare interfaces, ensuring compliance for assistive technologies and improving usability for patients with diverse needs in a regulated medical environment.
- Skills: HTML, CSS, React.js, Angular, TypeScript, RxJS, TailwindCSS,

Full-Stack Developer | Freelance

Mar 2022 — Jan 2024

- Developed and maintained end-to-end web applications using React, Node.js, and TypeScript, focusing on delivering responsive and functional interfaces for diverse clients while ensuring scalable architectures.
- Applied SOLID principles and Clean Code concepts to refactor legacy projects, resulting in increased code maintainability and a significant reduction in technical debt for long-term systems.
- Integrated unit tests using Jest to validate core business logic, improving overall application reliability and stability during the development lifecycle.
- Utilized Git for version control and gained hands-on experience with Docker and CI/CD workflows to automate deployment processes in personal and freelance environments.
- Managed and integrated relational databases such as PostgreSQL, ensuring efficient data flow and integrity between the front-end and back-end.
- Explored and implemented modern build tools like Vite to optimize development workflows and enhance final bundle performance for web platforms.
- Skills: React, Angular, Node.js, TypeScript, JavaScript, Next.js, Jest, React Testing Library, SQL, PostgreSQL, Docker, CI/CD, Git, Vite, SOLID, Clean Code, Claude Code, OpenAI Codex.

Education

Bachelor of Software Engineering, University of Mogi das Cruzes, Mogi das Cruzes

January 2022 — December 2025

Courses

Advanced React Fundamentals, RocketSeat

November 2025 — November 2025

International Exchange Program, Vancouver, Canada

January 2023 — February 2023
